

Position: Production Assembly

Assembly of pneumatic conveying systems from start to completed product. Equipment ranges in size from small conveyors on forklift frames to large ship unloaders on steerable tires. Serious inquiries only.

Job Responsibilities:

- Work closely with production personnel and engineers to prepare equipment - performing all functions related to the assembly process from picking component inventory through final assembly.
- Will be reading blueprints, process sheets, schematics, mechanical drawings, pictures and other diagrams to connect sub-assemblies used to assemble the final product.
- Receives work orders from the production manager and the sales department that determine components required for machine assembly.
- Assemble products with a focus on quality
- Inspect, test, and adjust completed units to ensure that units meet specifications and customer's order requirements.
- Record inspection data for each machine.
- Notify the production manager of any unusual problems or concerns
- Assemble hydraulic hose and repair hydraulic components as needed.
- Utilize hand and power tools to perform necessary job duties.
- Must be able to obtain forklift certification (training on-site) and be able to operate overhead cranes
- Assist the shipping department with loading ocean containers for international shipping.
- Communicate with purchasing to maintain required inventory levels for manufacturing.
- Some customer contact is required during equipment demonstrations and service inquiries.

Preferred Experience, Skills & Knowledge:

- The position requires a highly motivated, positive individual who can work both independently and in a "team" environment.
- Ability to handle multiple priorities simultaneously
- Experience working in a manufacturing environment
- Strong attention to detail
- Able to stand or walk for the majority of the workday
- Able to lift 50 pounds regularly and occasionally lift up to 75 pounds with assistance.
- Able to use a variety of hand tools and all power tools
- Must be able to utilize good common sense when working on R&D projects.
- Experience preferred in assembly and/or hydraulics and electrical assembly
- High School or Equivalent
